ABOUT

Software Engineering student with hands-on experience in building full-stack web applications using Python, Django, React, Next.js, and PostgreSQL. Experienced in developing scalable applications, REST APIs, and IoT-based solutions through academic projects and internships. Strong foundation in data structures, problem solving, and software development with a focus on building efficient and reliable systems.

EDUCATION

- MSc. Software Systems, PSG College of Arts and Science (2022–2027), CGPA: 8.6
 - HSC, PSGR Krishnammal Higher Secondary School (2021–2022), 83%
 - SSLC, PSGR Krishnammal Higher Secondary School (2019–2020), 74%
-

INTERNSHIP

Company: Mist Software Solutions Pvt., Ltd.,

ROLE: FullStack Developer Intern | July 2025 - October 2025 (3 MONTHS)

- Developed a responsive motor servicing website with online service booking and customer management features.
 - Implemented service listing, appointment booking, and MySQL database integration, reducing manual booking efforts by 70%.
 - Built frontend interfaces and backend modules using PHP, improving service management and customer data handling.
 - Collaborated on debugging, feature implementation, and testing to deliver a reliable and responsive web application.
 - Technologies: HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, XAMPP
-

SKILLS

- **Technical Skills:** Python, HTML, CSS, Bootstrap, SQL, NoSQL(MongoDB), MySQL, PostgreSQL, JavaScript, PHP, REST API, Django, C, C++, Data Structures & Algorithms, Debugging, Object Oriented Programming
 - **Computer Skills:** GitHub, Tableau, Power BI, Weka, Canva, VS code, Android Studio, PuTTY emulator(UNIX), TTS API, Bash(Linux), Docker, Arduino IDE
 - **Soft Skills:** Collaborative & Diplomatic, Learning Agility, Analytical Problem-Solver, Diligent Time Strategist, Adaptable & Flexible, Proactive Leader
-

PROJECT

SMART MACHINE HEALTH MONITORING SYSTEM

(2026 - 2027)

- Developed an IoT-based machine health monitoring system to collect and analyze real-time sensor data for predictive maintenance.
- Built an interactive dashboard using Streamlit and Flask REST APIs to visualize machine health and monitor live equipment status.
- Implemented threshold-based fault detection with automated alerts to enable proactive maintenance and it reduces downtime by 40%.
- Technologies: Python, Flask, REST APIs, Streamlit, SQLite, ESP8266 NodeMCU, Arduino IDE, HTML, CSS, JavaScript.

ASSETS MANAGEMENT SYSTEM

(2026-2027)

- Developed a role-based asset management system to streamline asset lifecycle, maintenance, inventory, and work order management.
- Implemented preventive maintenance, vendor management, and interactive dashboards, reducing asset management time by 60% compared to manual processes.
- Designed a centralized platform with secure role-based access and efficient asset tracking across organizational departments.
- Technologies: Python, Django, PostgreSQL, Next.js, React, Tailwind CSS, REST APIs, Git.

TERMS AND CONDITIONS VOICE READER

(2024 - 2025)

- Developed a web application that converts Terms & Conditions text into speech to improve accessibility and user experience.
- Implemented playback controls and multilingual text-to-speech functionality using the Web Speech API.
- Reduced the time required to review lengthy Terms & Conditions by up to 80% through audio playback and hands-free listening.
- Technologies: HTML, CSS, JavaScript, Web Speech API.

IMAGE COMPRESSION WEB APPLICATION USING K-MEANS CLUSTERING

(2024 - 2025)

- Developed a web application to compress images using the K-Means clustering algorithm while preserving visual quality.
- Implemented adjustable image resizing and color quality controls for optimized storage and faster processing.
- Enabled users to preview and download compressed images through an interactive interface.
- Technologies: Python, Streamlit, NumPy, Scikit-learn (K-Means).

CO-CURRICULUM ACTIVITIES

- **WORKSHOP** - Android Mobile Application Development conducted by IIT-Madras (2023)
- **WORKSHOP** - Introduction to Python conducted by IIT-Madras (2023)

CERTIFICATIONS

- **NPTEL** - Python for Data Science (2023)
- **NPTEL** - Software Testing (2023)
- Certified in Typewriting (Lower) accredited by the Government of Tamil Nadu. (2023)

COURSES

- Introduction to the Internet of Things and Embedded Systems (Coursera) (2026)
- Python for Data Science, AI & Development (Coursera) (2025)
- Cloud Computing Fundamentals (IBM SkillsBuild) (2025)
- Forage - SAP ABAP Virtual Internship Simulation (2025)
- Programming Mobile Applications for Android Handheld Systems: Part 1 (2024)

ACHIEVEMENTS

- Skill Enhancement and Employability Development (SEED) Representative at PSG College of Arts and Science (2025-2027).
- Google Developer Students Club (GDSC) Women Secretary at PSGCAS (2024–2025) - Organized 3 webinars and 1 workshop for 200+ students.
- Web Development Lead, GDSC at PSGCAS (2023–2024) - Conducted 2 workshops for 120+ students.
